

Fuller ROOM

01

Buckminster Fuller

ARCHITECT & SYSTEMS THINKER • 1895-1983

Fuller made the geodesic dome famous, a structure that covers enormous space with very little material. He spent his life on one question: how much can you do with the least?

IN THIS ROOM

Thoufeek Baber

Ayoub Alghali

Lila Galipeau

Damian Polan

Lamarr ROOM

02

Hedy Lamarr

ACTOR & INVENTOR • 1914-2000

Lamarr was a Hollywood movie star who also co-invented frequency hopping, a way for a radio signal to jump between channels so it stays hard to jam. The same idea shows up today inside Wi-Fi, Bluetooth and GPS.

Simon ROOM

03

Herbert A. Simon

ECONOMIST & AI PIONEER · 1916-2001

Simon won a Nobel Prize for showing that people decide with limited time and information, then pick the first option that is good enough. He also co-wrote the first program that proved mathematical theorems, which opened the field of AI.

Julian Urrego

Johnson ROOM 04

Katherine Johnson

NASA MATHEMATICIAN • 1918-2020

Johnson calculated the flight paths that put the first Americans in orbit and on the way to the Moon. John Glenn asked her to check the electronic computer's numbers by hand before he would fly.

IN THIS ROOM

Kerstan Deevy

Nick Stroncea

Hopper ROOM

05

Grace Hopper

COMPUTER SCIENTIST & REAR ADMIRAL • 1906-1992

Hopper built the first compiler, the tool that turns code people can read into something a machine can run. She believed computers should take instructions in plain English, and COBOL, the language she helped create, still runs banks today.

**Tomas Kolafa****Zachary Itzcovitch**

Carmack ROOM 06

John Carmack

GAME ENGINE PROGRAMMER • BORN 1970

Carmack wrote the engines behind Doom and Quake and made fast 3D graphics run on ordinary PCs. He released that code publicly years later, and a generation of engine programmers learned from it.

Torvalds ROOM 07

Linus Torvalds

CREATOR OF LINUX & GIT • BORN 1969

Torvalds started Linux as a side project in 1991 and gave it away for free. It now runs most of the internet, every Android phone, and all 500 of the world's fastest supercomputers.

IN THIS ROOM

Perlman ROOM 08

Radia Perlman

NETWORK ENGINEER • BORN 1951

Perlman invented the spanning tree protocol, which lets a room full of network switches agree on one clean path for traffic. Large ethernet networks stay up because of it, and she wrote the algorithm in about a week.

IN THIS ROOM

Parisa Zare

Leah Mazur

Neilda Gagne

Shannon ROOM

09

Claude Shannon

FOUNDER OF INFORMATION THEORY • 1916-2001

Shannon proved that any message can be measured in bits and sent perfectly across a noisy line. Every phone call, file and video stream since runs on the math he published in 1948.
